

Raychem and Nuheat Residential Applications

Chemelex residential products ensure the safety, comfort and reliability of your home.

1 Floor Heating

Transform your living space with the comfort and luxury of radiant floor heat. Spot heat individual spaces or heat the entire home.

2 Perimeter Heat

Mitigate heat loss and condensation buildup on curtain walls by installing in-floor perimeter heat. Unlike baseboard heaters, floor heat is silent, invisible, maintenance-free, and requires no interior space.

3 Roof & Gutter De-Icing

Prevents ice dams and icicles, protecting your roof and gutters from costly damage.

4 Surface Snow Melt

Keeps your driveways, walkways, and patios free of ice and snow for year round use.

5 Pipe Freeze Protection

Protects pipes from bursting and prevents water damage.

6 Hot Water Temperature Maintenance

Saves money and reduces water use with instant hot water at the faucet or showerhead.

7 Countertop Heat

Brings warmth to cold counters to create comfortable gathering spaces for family and friends.

Number	Product Choices
