SECTION 1 – PRODUCT OVERVIEW

This document describes the use and the capabilities of the Raychem Elexant Connect application.

Raychem Elexant Connect configuration and monitoring software is developed for Android version 11 and upwards as well as iOS version 15 and upwards. The software enables Raychem Elexant 3500i, and 5010i devices to be configured and monitored via a Wireless Bluetooth interface. The exact use of this software is described in this manual.

1.1 ELEXANT CONNECT USER MANUAL - VITAL INFORMATION

This manual is a guide for the setup and operation of the Elexant Connect application (formerly the Field Connect application). Important: All information, including illustrations, is believed to be reliable. Users, however, should independently evaluate the suitability of each product for their particular application. Chemelex makes no warranties as to the accuracy or completeness of the information and disclaims any liability regarding its use. Chemelex's only obligations are those in the Chemelex Standard Terms and Conditions of Sale for this product, and in no case will Chemelex or its distributors be liable for any incidental, indirect, or consequential damages arising from the sale, resale, use, or misuse of the product. Specifications are subject to change without notice. In addition, Chemelex reserves the right to make changes—without notification to Buyer—to processing or materials that do not affect compliance with any applicable specification.

1.2 ELEXANT CONNECT - LICENSE AGREEMENT

Terms and Conditions for “Elexant Connect”

This end-user license agreement (“EULA”) is between you (referred to as “You” or “Your”) and Chemelex LLC, 15375 Memorial Dr, Houston TX 77079, United States (the “Company”) who owns the application software named “Elexant Connect” (the “App”) through which You can, amongst other things, configure and monitor the Raychem Elexant 5010i Heat-Tracing Control Units, Elexant 3500i Electronic Thermostat and Raychem TraceTek TTSIM-3/4 (the “Units”). The Company licenses use of the App to You subject to the terms of this EULA. This App requires an Android device or an iOS device or a Windows PC device with a minimum of 100MB of memory (the “Device”). The App also requires internet access in order to be downloaded and/or to get the updates the Company might release from time to time. The App also requires an Android operating system of 11.0 and upwards or iOS version 15 and upwards or Windows version of 10 and upwards and a minimum screen resolution of 800 x 480 for Android / iOS device or 1024 x 700 for Windows device. You are responsible for making all arrangements necessary to ensure You have access to the App. This App will be available and can be accessed in any country, except for Restricted Countries subject to economic sanctions and constraints administered by the U.S. Treasury Department, or applicable export control measures administered by the U.S. Department of Commerce and U.S. Department of State, or any other government agencies. This App will only be supported by the Company in English. This means that if You require support to use this App, you must be able to communicate with the Company in English. The Company does not file a copy of this EULA. You should print a copy of this EULA for future reference.

Important Notice

By installing, downloading or streaming the App or any portion of the App You agree to the terms of this EULA which will legally bind You. If You are performing any of the foregoing on behalf of a company or other entity, “You” means that entity, and you are binding that entity to this EULA. You represent and warrant that you have the legal power and authority to enter into this EULA and that, if the licensee is an entity, this EULA is entered into by an employee or agent with all necessary authority to bind that entity to this EULA. If You do not agree to the terms of this EULA, You must not use the App and stop the installation, downloading or streaming process now. If the App was downloaded or otherwise installed, please destroy all copies of the App.

1. AGREED TERMS

Your use of the App and Company warranties

- 1.1 In consideration of You agreeing to comply with the terms of this EULA, the Company grants You a non-transferable, nonassignable, non-exclusive and revocable license to use the App on the Device, subject to this EULA and the Privacy Policy, incorporated into this EULA by reference. The Company reserves all other rights.
- 1.2 You agree that:
 - (a) You are solely responsible for any use of the App, including (without prejudice to clauses 3.2 and 11.2) any other user that You permit to use the App on the Device; and
 - (b) the Company shall not be liable to any user that You permit to use the App on the Device; and
 - (c) You are responsible for Your actions or those of any user that You permit to use the App on the Device.
- 1.3 You may install, download or stream a copy of the App onto the Device and view, use and display the App on the Device for (when the App is properly used in accordance with this EULA and on an operating system for which it was designed):

1. configuring and monitoring the Raychem Elexant 5010i Heat Tracing Control Units, the Elexant 3500i Electronic Thermostat and the Raychem TraceTek TTSIM-3/4 (the "Units"); and 2. updating the firmware of the Units.

- 1.4 You may not re-download or copy the App content. Features of the App may be available on a limited or temporary basis.
- 1.5 At the Company's sole discretion downloadable App content may be cancelled and/or no longer made available and in such circumstances the Company shall be under no obligation to ensure Your use of the App or App content (as the case may be) is resumed or that You are able to re-download the App content. Examples of this include (without limitation) limited availability in accordance with clause 1.4.

2. ACKNOWLEDGMENTS

You acknowledge and agree that:

- 2.1 the terms of this EULA apply to the App including any updates or supplements to the App unless such updates or supplements come with separate terms, in which case those terms apply;
- 2.2 from time to time updates to the App may be issued by the Company. Depending on the update, You may not be able to use the App until You have downloaded or streamed the latest version of the App;
- 2.3 You will be assumed by agreeing to the terms of this EULA to have obtained permission from the owners of the mobile telephone or handheld Device that is controlled, but not owned, by You to download, install or stream a copy of the App onto the Device. You and they may be charged by Your and their service providers for internet access on the Device. You accept responsibility in accordance with the terms of this EULA for the use (whether the use is by You or the owner of the Device) of the App on or in relation to any Device, whether or not it is owned by You and for any charges levied by service providers for Your use or the owner's use of the App on the Device;
- 2.4 the App specifications may be changed without prior notice;
- 2.5 the App is provided "as is" and no guarantee, implied or express, is provided by the Company should there be any error, data loss or any other event causing malfunction whatsoever;
- 2.6 the App is only to be used as a tool to assist with monitoring the Units and You must separately monitor (and continue to monitor) the Units in accordance with Your current procedures and the Company's instructions; and
- 2.7 subject to clause 7.1, all warranties, conditions and other terms implied by law (whether by statute, common law or otherwise) are excluded from this EULA.

3. LICENSE RESTRICTIONS

Except as expressly set out in this EULA or as permitted by applicable law, as part of the license from the Company to You at clause 1.1, You agree:

- 3.1 not to copy the App except where such copying is incidental to normal use of the App, or where it is necessary for the purpose of back-up or operational security;
- 3.2 not to rent, lease, transfer, assign, license, sub-license, loan (or otherwise distribute), distribute, translate, merge, adapt, sell, resell, reproduce, copy, publish the App or disclose the App to third-parties or otherwise commercially exploit the App or make it, or any portion thereof, available to any third party in any manner;
- 3.3 not create derivative works based on the App;
- 3.4 not copy any ideas, features, functions or graphics of the App;
- 3.5 not remove, obscure, alter or move the Company's and/or its licensors' proprietary notices;
- 3.5 not to make alterations to, or modifications of, the whole or any part of the App, or permit the App or any part of it to be combined with, or become incorporated in, any other programs;
- 3.6 not to disassemble, decompile, attempt to derive the source code or reverse-engineer the App (except to the extent that applicable laws prohibit reverse engineering restrictions, and then only as permitted by such laws);
- 3.7 not to use the App to violate, tamper with or circumvent the security of any computer network, software, passwords or otherwise engage in any illegal activity or enable others to do so;
- 3.8 keep all copies of the App secure and to maintain accurate and up-to-date records of the number and locations of all copies of the App; and
- 3.9 to include the Company's copyright notice on all entire and partial copies You make of the App on any medium.

4. APP USE RESTRICTIONS

When using the App You must and (without prejudice to clauses 3.2 and 11.2) You shall procure that other users of the App on the Device must:

- 4.1 not use the App in any unlawful manner, for any unlawful purpose, or in any manner inconsistent with this EULA, or act fraudulently or maliciously, for example, by hacking into or inserting malicious code, including viruses, or harmful data, into the App or any operating system; not use the App in a way that could damage, disable, overburden, impair or compromise the Company's systems or security or interfere with other users; not collect or harvest any information or data from the Company's systems or attempt to decipher any transmissions to or from the servers running any service; not take any activity which infringes upon (or has the risk of infringing upon) the intellectual property rights (such as the design rights) of the Company or any third party in relation to Your use of the App; not carry out any activity which infringes upon (or has the risk of infringing upon) the assets, the privacy, and the rights to usage of one's likeness belonging to the Company or any third party; not carry out any activity which unjustly prejudices and/or slanders the Company or any third party and/or any activity which damages the reputation and/or trustworthiness of the Company or any third party; not carry out any activity connected to (or has the risk of being connected to) fraud or any other criminal activity; not carry out any other activity which is against the law, is a violation of public order and standards of decency, or which infringes upon the rights of another user or other third party; and not carry out any other activity which could be deemed unsuitable by the Company.

5. INTELLECTUAL PROPERTY RIGHTS

- 5.1 You acknowledge and agree that all rights, title and interest, including all intellectual property rights in the App and its content anywhere in the World belong exclusively to the Company and that rights in the App are licensed, and not sold, to You and that You have no rights in, or to, the App or its content other than the right to use the App in accordance with the terms of this EULA.
- 5.2 You acknowledge and agree that You have no right to have access to the App in source-code form.
- 5.3 "Feedback" means all observing, evaluative or corrective information, statement, comment or observation about an incident, action, event, or process and other content or items prepared or otherwise provided by You to the Company in relation to the App. During the course of using the App, You may provide Feedback to the Company. The Company shall exclusively own all rights, title and interest, including all Intellectual Property Rights, in this Feedback. In the event that any Intellectual Property Rights in Feedback is deemed for any reason not to be exclusively owned by the Company, You agree to assign, transfer and convey to the Company, and hereby assign, transfer and convey to the Company, all right, title and interest, including Intellectual Property Rights, in such Feedback, and agree to provide reasonable cooperation to the Company, at the Company's expense, to perfect such rights.

6. DATA COLLECTION POLICY

- 6.1 In order to provide You with information tailored to Your interests, the Company may use the data You enter into the App.
- 6.2 The Company will only use Your data for research and analysis purposes and such use will be subject to the Company's Privacy Policy. For more information on how the Company may process that information, who the Company may share it with and Your rights to this data, a copy of the Privacy Policy can be obtained by emailing to privacy@chemex.com.
- 6.3 By agreeing to the terms of this EULA by installing, downloading or streaming the App You consent to such processing and You confirm that all data provided is accurate and contains the necessary permissions.

7. COMPANY'S LIABILITY TO YOU

- 7.1 Nothing in this clause 7 or this EULA shall limit or exclude the Company's liability to You for:
 - (a) death or personal injury resulting from the Company's negligence;
 - (b) fraud or fraudulent misrepresentation; and
 - (c) any other liability that cannot be excluded or limited by applicable law.
- 7.2 DISCLAIMERS
 - 7.2.1 You expressly acknowledge that your use of the App is at your sole risk. The Company provides you the App "as is" and "as available", with all faults and defects, without warranty and without maintenance or support services. The Company makes no representations or warranties of any kind, and the Company disclaims all warranties and representations whether express, implied, statutory or otherwise with respect to the App, including, without limitation any warranty:
 - (a) that the App will be compatible with all or any hardware and software which You may use, except a Device;
 - (b) that the App will be available at all times and will operate uninterrupted and be error free, virus free and secure;
 - (c) of merchantability, of fitness for a particular purpose, of satisfactory quality, of non-infringement, of quiet enjoyment,

- (d) related to the integrity, timeliness, reliability, and/or accuracy of the App; or
 - (e) that the App will necessarily work on the Device, even if Your Device meets all the operational and technical requirements.
- 7.2.2 Technical issues and updates are controlled by the Company. However, the Company is not liable or responsible for updating or maintaining Your personal licensed App copy.

7.3 LIMITATION OF LIABILITY

- 7.3.1 You acknowledge that the App has not been developed to meet Your individual requirements, and that it is therefore Your responsibility to ensure that the facilities and functions of the App as described in this EULA meet Your requirements.
- 7.3.2 Notwithstanding anything to the contrary and to the maximum extent permitted by applicable law, the Company will have no liability to You for any loss of profit, loss of business, loss of data, business interruption, or loss of business opportunity costs of substitute goods or services, or any indirect, consequential or special loss.
- 7.3.3 If the Company fails to comply with the terms of this EULA, the Company is only responsible for loss or damage You suffer that is a foreseeable result of the Company's breach of this EULA or the Company's negligence up to the limit specified at clause 7.3.4 but the Company is not responsible for any unforeseeable loss or damage. Loss or damage is foreseeable if it is an obvious consequence of the Company's breach or if they were contemplated by You and the Company at the time the Company granted You the license under this EULA.
- 7.3.4 The Company's (together with its affiliates) maximum aggregate liability to You (together with your affiliates) under or in connection with this EULA whether in contract, tort (including without limitation negligence) or otherwise, shall in all circumstances be limited to 2000 EUR in aggregate.

8. TERMINATION

You may terminate this EULA by ceasing use of the App and uninstalling the App. The Company may terminate this EULA (in whole or in part) at any time with immediate effect on written notice to You:

1. if You are in breach of this EULA;
2. if You give the Company false information or withhold from the Company important information in relation to Your use of the App;
3. if You breach the License Restrictions or App Use Restrictions at clauses 3 and 4 respectively;
4. if You attempt to defraud the Company or act dishonestly;
5. if the App is no longer provided or supported by the Company or its affiliates; or
6. if required to do so by applicable law or regulation, and/or if there is a change in the applicable law that would have a material impact (including a cost impact) on the provision of the App.

Where the Company terminates Your EULA, all license rights granted to You shall immediately terminate and You must cease use of the App, uninstall the App immediately and provide confirmation of the same to the Company in writing (if requested by the Company). Termination will not limit any of Chemelex's rights or remedies at law or in equity. You are responsible to save and export the data you enter into the App regularly. After termination of this EULA, the Company may delete the data you have entered in the App.

9. COMMUNICATION BETWEEN US AND ENQUIRIES

9.1 Communications

(a) The Company reserves the right, at any time and from time to time, to update, revise, supplement, and otherwise modify this EULA, for example but not limited to, to comply with changes in the law or to take account of new functionalities of the App that the Company may offer. Such updates, revisions, supplements and other modifications will be effective immediately upon publication. Your continued use of the App will be deemed to constitute Your acceptance of such updates, revisions, supplements and other modifications. If you do not agree to any such updates, revisions, supplements and other modifications, please discontinue using the App and uninstall the App.

(b) The Company will not necessarily bring changes or updates to Your attention other than in accordance with clause 9.1(a). It is therefore important that You read the terms of this EULA each time You install, download or stream the App to ensure that You are aware of any changes and that You agree to any changes.

(c) ...If You wish to contact the Company in writing, or if any condition in this EULA requires You to give the Company notice in writing, You can send this to us by e-mail to info@chemelex.com or by prepaid post to Chemelex Europe GmbH, with registered office at Grabenstrasse 15, 8200 Schaffhausen, Switzerland. The Company will confirm receipt of this by contacting You in writing, normally by e-mail. Please ensure that Your email address is provided.

9.2 Enquiries

If You have any questions regarding this App, wish to report a bug, or if You have additional features You would like to recommend for this App please contact the Company at: info@chemelex.com

10. EVENTS OUTSIDE OF THE COMPANY'S CONTROL

- 10.1 The Company will not be liable or responsible for any failure to perform, or delay in performance of, any of its obligations under this EULA that is caused by any act or event beyond the Company's reasonable control including but not limited to failure of public or private telecommunications networks, acts of God, flood, drought, earthquake or other natural disaster; epidemic or pandemic; terrorist attack, civil war, cyberattacks, civil commotion or riots, war, threat of or preparation for war, armed conflict, imposition of sanctions, embargo, or breaking off of diplomatic relations; any Laws or any action taken by a government or public authority, including without limitation imposing an export or import restriction, quota or prohibition; collapse of buildings, fire or explosion; and any labor or trade dispute, strikes, industrial action or lockouts ("Event Outside the Company's Control").
- 10.2 If an Event Outside the Company's Control takes place that affects the performance of the Company's obligations under this EULA: (a) the Company's obligations under this EULA will be suspended and the time for performance of its obligations will be extended for the duration of the Event Outside the Company's Control.

11. OTHER IMPORTANT TERMS

- 11.1 The Company may at any time assign, transfer, mortgage or deal in any other manner with all or any of its rights and obligations under this EULA.
- 11.2 You may only transfer Your rights or obligations under this EULA to another person if the Company agrees in writing.
- 11.3 Subcontracting. Subject to mandatory applicable Laws, the Company shall be permitted to subcontract or delegate in any manner any or all of the performance of its obligations under the EULA to any Affiliate, contractor or any other third party service provider without requiring Your prior written consent.
- 11.4 If the Company fails to insist that You perform any of Your obligations under this EULA, or the Company does not enforce its rights against You, or the Company delays in doing so, that will not mean that the Company has waived its rights against You and will not mean that You do not have to comply with those obligations.
- 11.5 This EULA and all documents referred to herein constitute the entire agreement between You and the Company and supersede any prior agreement or arrangement in respect of its subject matter and neither party has entered into this EULA in reliance upon, and it will have no remedy in respect of, any misrepresentation, representation or statement (whether made by the other party or any other person) which is not expressly set out in this EULA or in the documents referred to herein. Nothing in this clause will be interpreted or construed as limiting or excluding the liability of either party for fraud or fraudulent misrepresentation.
- 11.6 Each of the conditions of this EULA operates separately. If any court or competent authority decides that any of them are unlawful or unenforceable, the remaining conditions will remain in full force and effect.
- 11.7 Any affiliate of the Company may seek to enforce the terms of this EULA to the extent they confer a benefit upon it. Otherwise, none of the terms of this EULA shall be enforceable under the Contract (Rights of Third Parties) Act 1999 by any third party and no other person therefore shall have any rights to enforce any of the terms of this EULA between You and the Company.
- 11.8 Please note that this EULA and any non-contractual obligations arising out of or in connection with it are governed by English law. You and the Company agree that the courts of England and Wales will have exclusive jurisdiction to determine any dispute arising out of or in connection with this EULA (including in relation to any non-contractual obligations).

SECTION 2 – HOW TO RUN THE ELEXANT CONNECT APPLICATION

Click on the icon of the Elexant Connect application

SECTION 3 – INITIAL SETUP OF THE UNIT

After the program starts, the Startup screen (Fig 1) will be displayed. If it is the first time opening the app, you will be prompted to enter the application Unlock Code (Fig 2). Please contact your Chemelex Technical Support team to get the unlock code. Enter the Unlock Code and click on the “Unlock” button. You will also be prompted to review and accept the Terms and Conditions (Fig 3) to use the app.

Figure 1: Startup screen

Figure 2: Unlock code screen

Figure 3: Terms & Conditions

Ensure that the device location sharing (**Fig 4**) and Bluetooth (**Fig 5**) are enabled as these are required to use most features of the application.

Figure 4: Device location sharing screen

Figure 5: Enable Bluetooth screen

All the app sections show the most common, most used parameters of the Elexant 3500i, and Elexant 5010i devices. Certain settings / parameters are relevant only to specific devices and may / may not be visible to all devices.

3.1 MAIN SCREEN

The main screen (**Fig 6**) will be blank every time you open the app. To display a list of devices you can connect to, read section 3.4.

Figure 6: Main screen

There is a toolbar (3 bars) on the top right of the screen. When the toolbar is clicked, it will show Settings, Tools, Support, and About.

Figure 7: Main screen with 3 bars clicked

3.2 APP TOOLBAR

3.2.1 App Settings

In the settings, the user can change Temperature, the language the app will display as well as expand views by default.

Figure 8: App Settings Screen

3.2.2 Support

Support screen (Fig 9) provides information on whom to contact for support questions.

Figure 9: Support Screen

3.2.3 About

The About screen (Fig 10) provides basic information about the App. The Terms and Conditions (Fig 3) can also be accessed from this screen.

Figure 10: About Screen

3.3 TOOLS

Clicking on Tools will provide options to perform a firmware update or reset device.

Figure 11: Tools Screen

3.3.1 Firmware Update Screen

This button will be used to update d device's firmware. Click on New update task **(Fig 12)**.

Figure 12: Firmware Update Screen

You select a file stored in the tablet running the app, which is the .bin file to update the firmware for a device **(Fig 13)**.

Figure 13: Firmware Update Job Screen

3.3.2 Reset Device Password

Reset Device password will be explained in Section 11.2.3 (Fig 42).

3.4 MANAGE DEVICE PAIRINGS

The last button is the Refresh button.

3.4.1 Scanning for Nearby Devices

The way you can pair with either an Elexant 3500i, or Elexant 5010i is by first scanning for devices by clicking the Refresh Button on the top right of the Main Screen. This will scan for all available Raychem devices, which might take a while depending on how many you have (**Fig 14**). Before scanning, you can filter out what device you want to see by using the Add filter dropdown. When scanning, progress info will be displayed at the bottom of the screen. This progress screen can be expanded by selecting View. From here, three things will show up on the screen after a device has been found: the device type (Elexant 3500i, or Elexant 5010i), signal strength and the MAC address for that device.

Figure 14: Scanning for Devices

3.4.2 Fetching Data from Scanned Devices

After the scanning process is done, click on the three horizontal dots associated with the specific paired device and select "Add Device" (**Fig 15**). The app will begin fetching data for the selected devices. You can also skip the fetching process by clicking Cancel (**Fig 16**).

When data fetching is complete the screen will look like (**Fig 17**). It will fetch the device tag and firmware version. If the device has Bluetooth security (section 11.2) enabled, a locked symbol will be shown.

Figure 17 shows how to filter and figure 18 shows how to group with the Elexant Connect App.

Figure 15a: Add Device

Figure 15b: Cancel Add Device

Figure 16: Devices Found

Figure 17: Filter Devices

Figure 18: Group Devices

3.4.3 Remove a Device

Select the 3 horizontal dots associated with a specific paired device and clicking on Remove from My Devices disconnects the device from the application.

3.4.4 Re-fetch Device Data

Select the 3 horizontal dots associated with a specific paired device and clicking on Re-fetch Data retrieves updated data from this device.

SECTION 4 – SCREEN LAYOUT

4.1 TOP SECTION SCREEN

Each screen will show the same header information, which looks as follows. You can slide the Tab Section to see the rest of the tabs. Please note that not all settings will be available depending on which Device the Elexant Connect Application is pairing with.

Figure 19: Top Section Application

4.1.1 Device Settings

In the Settings there will be 3 options, Security, Bluetooth and Limiter Mode (**Fig 20**). Security is specific to certain devices only and is described in Section 11.2.

Bluetooth toggle switch allows you to enable / disable the Bluetooth functionality of the device. The Limiter Mode functionality is explained in Section 11.4

Figure 20: Device Settings Screen

4.2 DEVICE TABS

All information of the Device is displayed in separate displays. The user can select different screens for detailed overviews. The selections are:

- Overview
- Alarms
- Configuration
- Maintenance
- Setup
- Settings

The different screens display relevant information for the specific selected devices. Not all the devices will have the same information as shown in the screen.

4.3 GENERAL PARAMETER INFORMATION

The user can slide the screens to the left and right to go to the preferred screen.

	Information displayed with light grey background are monitoring data, cannot be changed by user
--	---

	Information displayed with white background are Device settings and can be changed by the user.
--	---

4.4 GENERAL ALARM SETTINGS

Each control alarm setting consists of the following selection boxes:

- Enable / disable: to enable or disable the alarm
- Latch: To make the alarm permanent till the alarm is reset. By deselecting the selection box, the alarm will disappear once the alarm setting has disappeared
- Setpoint: This is the value on which the alarm will be activated
- Filter time: This defines how long an alarm situation should exist before the alarm signal is activated / alarm generated in the alarm summary.

SECTION 5 – OVERVIEW SCREEN

This overview will enable the user to have a quick overview of the Device.

Figure 21: Overview Screen

The Device Info section describes the Modbus address of the device, the device tag, firmware version of the device, the output status and the number of alarms of the unit.

The Temperature Data section presents:

- Control Temperature based on what Control Temperature Mode was selected (lowest, average or selected source)
- Temperature on which the heater was last on
- Temperature Sensor 1
- Temperature Sensor 2
- Temperature source 1(the input to the Device – under normal conditions this is sensor 1)
- Temperature source 2(the input to the Device – under normal conditions this is sensor 2)

More source options are also available for specific devices. These are not used with the current version of the Elexant 3500i, and Elexant 5010i software but are available for future extensions.

The Electrical Data section shows the monitored electrical information of the device. This includes:

- Voltage
- Current
- Ground Fault
- Trace Resistance (calculated)
- Power consumption
- Heater on time
- Contact Cycle count

Ground fault information is presented in this section. Ground fault can be alarmed upon and/or trip the Device, depending upon customer requirements.

SECTION 6 – ALARM SCREEN

Figure 22: Alarm Overview Screen

The alarm screen shows all alarms present in the Device. The alarms can be reset one by one (Reset Selected), or all by once Multiselect.

The alarm message describes:

- Time Stamp
 - The time on which the App has read that there is an alarm. It is not when the Alarm had occurred
- The Alarm Type
- The Alarm Value
 - If the Alarm has an associated Setpoint value for it, the value that would be shown is value that raised the Alarm

SECTION 7 – TEMPERATURE CONFIGURATION SCREEN

The temperature configuration screen presents all data available in the Device related to the temperature control.

The left side navigation bar under Temperature has additional tabs.

These tabs allow the user to view all details on:

- Control
- Sensor 1
- Sensor 2
- Source info

7.1 TEMPERATURE – CONTROL SCREEN

The screenshot shows the 'Temperature' configuration screen for the 'Elextant 5010i-202A' device. The top status bar shows the time as 10:44 on Thursday, Dec 11. The left navigation bar has tabs for 'Temperature', 'Electrical', and 'Limiter'. Under 'Temperature', there are sub-tabs for 'Control', 'Sensor 1', 'Sensor 2', and 'Source'. The 'Control' tab is selected, showing the following configuration options:

- Setpoint:** 1292 °F
- Mode:** TS2 (dropdown menu)
- Fail Mode:** Fail Off (dropdown menu)
- High Limit Cutout Alarm:** Enabled (toggle), Setpoint: 1292 °F, Latch: Disabled (toggle)
- Low Limit Cutout Alarm:** Enabled (toggle), Setpoint: -94 °F, DeadBand: 37 °F, Latch: Enabled (toggle)
- Control Temperature High Alarm:** Disabled (toggle)
- Control Temperature Low Alarm:** Enabled (toggle), Setpoint: 14 °F, Filter: 0 s, Latch: Enabled (toggle)
- Control Temperature Fail Alarm:** Enabled (toggle), Latch: Enabled (toggle)

At the bottom left, there are 'Import' and 'Export' buttons.

Setpoint:

The temperature on which it switches the Device on or off.

Mode:

Lowest: Setting the Temperature Control to Lowest means that the output of the Device will be controlled based on the lowest temperature measured by any of the temperature sensors connected to the Device

Average: Setting the Temperature Control to Average means that the output of the Device will be controlled based on the average temperature measured by all the Temperature sensors connected to the Device.

Sources: Setting the Temperature Control to a Source means that the output of the Device will be controlled based on the temperature measured by that source. There are 1 to 8 different sources to pick from

Fail Mode

Fail Off: when the control sensor(s) of the Device fail the output switch will open.

Fail On: when control sensor(s) of the Device fail the output switch will be permanently close.

Last %: this Fail Mode is only applicable to the control mode PASC or Proportional Ambient sensing. It will control the output in a similar manner as it was doing before the sensor(s) failed. This Alternate ON/OFF switching will be time based only - there will be no relation to temperature.

Fixed %: it will alternate the control output ON and OFF at a certain interval.

Figure 23: Temperature Control Screen

7.1.1 High Limit Cutout

The High Limit Cut-Out function prevents the heated surface from overheating. When the High Cut-Out Temperature Set Point is reached the Device output will be turned OFF regardless of whether or not the maintain temperature is reached. Use this function for instance to prevent the cable surface temperature exceeding a certain level. It can be configured to operate as either a latching or non-latching type. When the Latching button is set to YES then each time an alarm has occurred the Alarm needs to be manually reset. When set to NO then the alarms will be self-healing and will disappear when the alarm condition is no longer present. The high limit cutout does not need to be reset for normal operation of the Device. Once the conditions are healthy again, the Device will work based on the temperature setpoint.

7.1.2 Low Limit Cutout

The Low Limit Cut-Out function gives the user control of the heater by allowing it to be active in a certain range. When the temperature goes below the Low Limit Cut-Out temperature, the Device output will be turned OFF regardless of whether or not the maintain temperature is reached. It can be configured to operate as either a latching or non-latching type. When the Latching button is set to YES then each time an alarm has occurred the Alarm needs to be manually reset. When set to NO then the alarms will be self-healing and will disappear when the alarm condition is no longer present. The Low limit Cut-Out Alarm does not need to be reset for normal operation of the Device. Once the conditions are healthy again, the Device will work based on the temperature setpoint. You can set a Deadband value for Low limit Cut-Out, if the temperature is less than "Low Limit Cutout Setpoint - Deadband Value", the alarm will be raised.

7.1.3 Control Temperature Alarms

These are the temperatures at which the Device will generate an alarm when the value has been surpassed.

7.2 TEMPERATURE - SENSOR 1 / SENSOR 2

The screenshot shows the 'Configuration' tab for the 'Elexant 5010i-202A' device. The left sidebar has a 'Temperature' section with 'Sensor 1' selected. The main area is titled 'Sensor 1' and contains the following fields:

- Tag:** Elexant 5010i-TS1-202A
- Type:** 2 or 3 Wire 100 Ω NiFe
- Lead Resistance:** 200

Below these fields are three toggle switches for alarms, all of which are currently turned off:

- Sensor 1 Temperature High Alarm
- Sensor 1 Temperature Low Alarm
- Sensor 1 Temperature Fail Alarm

At the bottom of the page are 'Import' and 'Export' buttons.

Sensor Tag

Each sensor in the Device can have a tag name (max 40 characters)

Type

The Device sensor type can be set to

- 3 wire PT100 (most cases)
- 2 or 3 wire 100 Ω NiFe
 - Which will prompt for a lead resistance
- Not used

Alarms

For each sensor high temperature alarm, low temperature alarm and sensor temperature failure alarm can be set.

Figure 24: Temperature Sensor 1/2 Tab

7.3 TEMPERATURE – SOURCE

Figure 25: Temperature Source Tab

7.4 IMPORT / EXPORT CONFIGURATION

The Import and Export buttons at the bottom of the left side navigation bar (**Fig 23**) allows the user to Import/Export configuration parameters to or from the device as well allows downloading of monitoring data of the device. During configuration imports, the following fields will not be imported: Modbus Address, Device Tag, Linked Device Tag (3500i only) and Sensor Tags.

On this page, each temperature source's Sensor Mode can be configured.

The Modes supported are:

- Not Used
- Local
 - Will prompt you to choose either Sensor 1 or 2

Each source can be used for:

- Control
- Low limit cutout
- High limit cutout

For each source the alarms can be set:

- Enabled / disabled
- Latched / non-latched

Based on the selected device, the sources 3-8 become visible. These are currently not used in the Elexant 4500i and Elexant 5010i devices.

SECTION 8 – ELECTRICAL CONFIGURATION SCREEN

This section of the screen shows the monitored electrical information of the Device. This includes:

- Voltage
- Current
- Ground Fault
- Trace Resistance (calculated)
- Power consumption
- Heater on time
- Contact Cycle count

8.1 ELECTRICAL CONFIG 1 / CONFIG 2

Figure 26: Electrical Config 1 Screen

On Config 1 tab, what Switch Control Mode the Device will use can be selected.

The Switch Control modes available are:

- On/Off
- Proportional Ambient
- PASC
- Force On
- Force Off

Each of these modes will have different parameters which will be shown when selected.

The following electrical alarms can be set on this page:

- Switch Fail Alarm
- Load current High Alarm
- Load current Low Alarm
- Ground Fault High Alarm
- Ground Fault Trip Alarm
- Ground Fault CT Fail Alarm

Figure 27: Electrical Config 2 Screen

The following electrical alarms can be set on the Electrical – Config 2 page:

Nominal Trace Resistance:

- The calculated value of the tracing resistance. (Ohms)

Trace Resistance High Alarm:

- If the calculated tracing resistance deviates more than x% an alarm will be generated

Trace Resistance Low Alarm:

If the calculated tracing resistance deviates more than x% an alarm will be generated

- Line Voltage High Alarm
- Line Voltage Low Alarm

Figure 28: Maintenance Screen

Alarm Settings

Auto Cycle

- The auto-cycle feature will switch on the Device for 1 minute each x hours as defined in this setting. During this period the Device will test its proper working. Any malfunction will be reported as an alarm. Note that the Elexant 3500i has a fixed Auto Cycle setting of 24 hours, but can be enabled or disabled.

Device Reset

- Alarm will be generated when the Device cycles power

Contact Cycle Count

- Enables an alarm after x number of switches.

Heat On-Time

- Count the hours the heat tracing cable has been switched on.

Logistics

This section describes the minimum and maximum measured values of the Device since the last reset

Accumulators

Count the hours on, in use, power and contact cycle count

SECTION 10 – SETUP SCREEN

Figure 29: Device Setup Screen

The top of the screen allows the user to change the name of the device.

RS485 Communication Parameters can be changed here as well.

The app provides the option of selecting which of the 16 Load Shedding Zones the Device would be a member of. For more details on Load Shedding, please refer to Raychem Supervisor Operations Manual.

Alarm Relay Output Mode has 3 different options

- Normal
- Toggle
- Flash

The temperature unit shown on the LED Display can be set here.

Turning on Test Trace will turn on the heater for x seconds, allowing the Device to detect any abnormal activities.

SECTION 11 – DEVICE SPECIFIC FEATURES

This section describes features that are specific to certain devices.

11.1 FIND A SPECIFIC DEVICE (ELEXANT 3500i)

On the My Devices screen (**Fig 7**), Select the 3 horizontal dots associated with a specific paired 3500i device and clicking on Find Me blinks the lights on that specific device.

Figure 30: My Devices Screen

11.2 BLUETOOTH® SECURITY (ELEXANT 3500i AND ELEXANT 5010i)

An Elexant 3500i or Elexant 5010i Device can have Bluetooth communication protected by password security. By default, the Device is not secured. A secured Device can be in a locked or unlocked state. When the Device is locked, a lock icon will be visible beside the device name.

11.2.1 Enabling Bluetooth® Security

To enable Bluetooth® Security, select the specific device, click Settings and then slide the Security toggle to the right (**Fig 31**). This will pop up the Create Password Screen (**Fig 32**).

To set up Bluetooth® Security, enter a matching password in the two fields and click Set Password. Make sure “Enable Bluetooth® Security” is enabled.

Figure 31: Enable Bluetooth Security Screen

Figure 32: Enable Bluetooth Security Password Screen

Once the security is setup, if a device is locked, you will be able to read values using the app but will not be able to change any values. To remove Bluetooth Security, slide the Security toggle to the left.

11.2.2 Unlocking a Device

There are three ways to open the sign in popup screen to unlock the device.

- Click the Lock Icon on the top of the screen and you will be prompted asking you to change to unlock the device. Enter the password and click on the Unlock button (**Fig 33**).
- Try to change any of the values with a white background and you will be prompted asking you to unlock the device. Enter the password and click on the Unlock button (**Fig 33**).
- Navigate to the Settings tab of the device and click on Security (**Fig 26**). The Unlock device screen will display. Enter the password and click on the Unlock button (**Fig 27**).

Figure 33: Device Unlock using Lock Icon / Changing Values

Figure 34: Device Unlock using Settings Tab

Once you have unlocked the device, you will be able to write but if you close the app or leave the Device Screen, the security will be activated again.

11.2.3 Reset Device

If you have forgotten your password, you can request to reset your password (Fig 11). This will generate a key (Fig 35) which you will have to send to Chemelex Customer Support who will in return give you a code which will reset your security on your device. Reset Code List (Fig 36), which is shown in the Reset Device Screen will display the reset codes for your devices that you requested for. These keys will only last 48 hours, where, 24 hours after the first key was generated, a new one will be generated if you request again.

Figure 35: Reset Device Popup Screen

Figure 36: Reset Code List Screen

11.3 LIMITER SCREEN

This section in the Elexant Connect application describes how to configure the SIL2 approved Safety Temperature Limiter in the Elexant 5010i-LIM. The purpose of the limiter is to prevent heating applications from overheating. The Safety Temperature Limiter is approved for use in Hazardous area Zone 1, Zone 21, Zone 2 and Zone 22.

The functionalities described in this section are not yet supported in the latest 2.0 version of the app in the respective stores. This section is still relevant for the 1.0 version of the app.

The screenshot displays the 'Elexant 5010i-202A' configuration screen. The top navigation bar includes 'Alarms', 'Configuration', 'Maintenance', 'Setup', and 'Settings'. The 'Configuration' tab is selected, showing a list of configuration items on the left: Temperature, Control, Sensor 1, Sensor 2, Source, Electrical, Config 1, Config 2, Limiter, and Control (highlighted). The main content area shows the 'Control' configuration for the 'Elexant 5010i-202A' device. It includes a 'Status' section with 'Temperature' (30 °F), 'Version' (1.0), and 'Status' (LATCH DISABLED). The 'Control' section provides instructions for setting the temperature limiter set point and a 'Setpoint' field (1112 °F) with an 'Apply' button. Below this is the 'Temperature Extremes Since Reset' section with 'Min' (30 °F) and 'Max' (32 °F) fields and a 'Reset' button. The 'Alarms' section lists three alarms: 'Limiter Trip Alarm', 'Limiter Communication Fail Alarm', and 'Limiter Temperature Fail Alarm', each with a 'Latched' status. At the bottom, there are 'Import' and 'Export' buttons, and a 'Test' section with 'Force Trip' and 'Reset Trip' buttons.

Version:

This field shows the actual firmware revision of the Safety Temperature Limiter.

Safety Limiter Status:

This field shows the actual status of the Safety Temperature Limiter.(Normal operation, Tripped, Latch Temporarily Disabled)

Safety Limiter Temperature:

Shows the temperature actually being measured by the Limiter RTD. If this value surpasses the Safety Limiter Set Point the Safety Limiter will trip open. Once the Safety Limiter has tripped a manual intervention will be required to Reset / Rearm the Safety Temperature Limiter. Resetting the safety Temperature limiter will be only possible after all process conditions have returned to a safe state. (The Limiter Temperature has dropped below the Limiter Temperature Set Point.)

Safety Limiter Temperature Set Point:

This field holds the Safety Limiter Set Point. This value should be chosen in accordance with the Temperature Class of the area in which the heating application is installed (T-class T4, T3, T2) or the maximum surface temperature allowed for the heating device assuming this is a lower temperature. Since the Safety Temperature Limiter is a safety device it requires a special procedure to write a new set point to the Temperature limiter. Tap in the Limiter Temperature Set Point field to start the write procedure. This will open a new screen.

Note: When using Fahrenheit, temperatures may be off by one degree.

Figure 37: Limiter Overview Screen

From this point onward the Elexant Connect app device will send the new set point at regular intervals to the Devices (Polling). The polling process will be repeated until the process is cancelled or until the Safety Limiter Set button inside the unit is pressed. Press and hold the button for 3 seconds. The Display of the Device will flash briefly and show actual and new limiter cut out temperature.

The Safety Limiter Temperature Set button is the Black Push button on the left-hand side of the Elexant 5010i-LIM hardware as is shown on Figure 32 below. After the new set point has been successfully updated a message will appear confirming the new set point has been successfully updated.

Figure 38: Elexant 5010i-LIM

11.3.1 Reset the Safety Temperature Limiter

Once the safety Temperature limiter has tripped it will need to be reset in order to restore normal operation. Resetting the Safety Temperature limiter will only be possible after safe operating conditions have returned.

Resetting the Safety Temperature Limiter is a safety Function therefore the Reset operation is protected by a password in order to prevent the Safety Temperature limiter from being reset unintentionally. The Safety temperature Limiter can be reset from the app. In order to do so, tap on Reset Tripped Limiter. A number will be displayed on the screen that needs to be entered in the box as confirmation to reset the limiter.

11.3.2 Trip Limiter - Test Function for SIL Approved Safety Temperature Limiter

This is the test function of the SIL 2 approved Safety Temperature limiter. Hit this field in order to Test the safety Temperature limiter at regular intervals at least once every year. When tripped a screen will pop up confirming that the Safety Temperature Limiter has tripped successfully. In order to rearm the safety temperature limiter, follow the procedure as explained in the previous paragraph.

11.4 LIMITER MODE FOR THE ELEXANT 3500I

This section in the Elexant Connect application describes how to configure an Elexant 3500i Electronic Thermostat as a Limiter device. Please note that only the Communicating, Current Sensing, and Ground Fault Detecting variants of the Elexant 3500i can be configured to be used as a Limiter device. The purpose of the limiter is to prevent heating applications from overheating.

To configure an Elexant 3500i as a limiter device, navigate to Settings tab of the selected 3500i.

Next, select Limiter Mode. From here slide the toggle to the right to turn on Limiter Mode.

Figure 39: 3500i Limiter Device Configuration Screen

After enabling Limiter Mode, you will be prompted with this warning. Please note that enabling Limiter Mode will reset the Elexant 3500i to its default configuration (**Fig 40**).

When enabling Limiter Mode, you must enter the 4 digit confirmation code displayed to confirm the setting (**Fig 41**).

After enabling Limiter Mode, you will be prompted with this warning. Please note that enabling Limiter Mode will reset the Elexant 3500i to its default configuration. When enabling Limiter Mode, you must enter the 4 digit confirmation code displayed to confirm the setting.

Figure 40: 3500i Limiter Device Configuration Warning Screen

Figure 41: 3500i Limiter Device Configuration Confirmation Code Screen

Once enabled, the Elexant Connect Application will display the Limiter Tab.

Figure 42a: 3500i Limiter Control Screen 1

Figure 42b: 3500i Limiter Control Screen 2

Limiter Status

This field shows the actual status of the Temperature Limiter. (Normal Operation, Tripped, Latch Temporarily Disabled).

Temperature

Shows the measured temperature of the Limiter RTD. If this value surpasses the Temperature Limiter Set Point the Temperature Limiter will trip open. Once the Temperature Limiter has tripped, a manual intervention will be required to Reset / Rearm the

Temperature Limiter. Resetting the Temperature Limiter will only be possible after all process conditions have returned to a safe state. (The Limiter Temperature has dropped below the Temperature Limiter Set Point).

Temperature Limiter Set Point

This field holds the Temperature Limiter Set Point, and should be selected in accordance with the temperature class of the area in which the heating application is installed or the maximum surface temperature allowed for the heating device.

11.4.1 Reset the Temperature Limiter

Once the Temperature Limiter has tripped it will need to be reset in order to restore normal operation. Resetting the Temperature Limiter will only be possible after safe operating conditions have returned. Resetting the Temperature Limiter is protected by a password in order to prevent the Temperature Limiter from being reset unintentionally. The Temperature Limiter can be reset from the application. In order to do so, tap on Reset Trip. A number will be displayed on the screen that needs to be entered in the box as confirmation to reset the limiter.

11.4.2 Trip Limiter

The Temperature Limiter may be forced to trip in the application to verify its functionality. To test the function of the Temperature Limiter, tap on Force Trip. When tripped a screen will pop up confirming that the Temperature Limiter has tripped successfully. In order to rearm the Temperature Limiter, follow the procedure as explained in the previous section.

11.4.3 Alarms

The Limiter Trip Alarm is always enabled and latching. The user does not have the ability to change these settings.

The user will be able to enable / disable the Limiter Temperature Fail Alarm along with the ability to set the alarm as latching or non-latching.
